# SAVONIXCARE

Create personalized cognitive care plans. Instantly.

Be Confident in Providing Gold-Standard Care

- SavonixCare delivers best-in-class diagnostic support from the American Psychiatric Association's diagnostic manual, the **DSM-V**

- Our care planning tool derives suggestions from the world renowned **National Institute for Health and Care Excellence (NICE)** guidelines

Impact Care in Real-Time for Better Outcomes

- Generate a care plan in **real-time**, immediately following a cognitive assessment

- **Anticipate** whether advanced care is necessary instead of being reactive

- **Implement interventions** in a timely manner to increase speed of care, extend patient independence, and prevent adverse events due to poor cognition

Spend More Time with Your Patients

- SavonixCare consolidates cognitive test results and related health screens to generate **instant and personalized care plans**

- **Efficiently** create a cognitive care plan so that more of your time can be spent with your patient

- More time means more opportunity to engage with the patient and to **discuss which interventions** are right for them

ABOUT SAVONIX – The Virtual Neuropsychologist Solution

The Savonix platform is your end-to-end neuropsychology solution. Savonix is the first mobile, consumer-friendly, clinically valid tool to screen for cognitive decline. As a cloud-based platform, Savonix is a turnkey solution that empowers healthcare providers to understand their patients' cognitive health.

1. Savonix Mobile App
Assess your patients' brain health across multiple cognitive domains either in clinic or from home.

2. Savonix Lifestyle Questionnaire
Generate lifestyle recommendations about brain health tailored to each patient.

3. Savonix Clinical Dashboard
Instantly review cognitive assessment results to understand the patient's cognitive strengths and weaknesses.

4. Savonix Summary Report
Educate patients on their results in a format that is straightforward and easy for them to understand.

5. SavonixCare – DSM-V
Contextualize cognitive health data with diagnostic support detailed by the DSM-V.

6. SavonixCare – NICE
Plan interventions using care planning support mapped to NICE guidelines for dementia.
