

Elevates Clinical Cognitive Research

Recruiting the Right Participants Can Be Difficult

- On average, one eligible participant is identified for every 10 people screened.
- Minorities like Latinos and African Americans are underrepresented in clinical trials
 - Only **18%** are Hispanic or Latino
 - Only **9%** are Black or African American

Obtaining Accurate Data Can Be Challenging

- Human error means data cannot be captured accurately to the millisecond and is subject to rater bias.
- Traditional cognitive testing tools can take days and even weeks before test results can be accessed.
- Each participant tests differently making objective testing conditions critical for accurate scoring and data collection.

Savonix Elevates Cognitive Research with Our Accurate and Reliable Cognitive Data

As a researcher, accurate and reliable cognitive data is crucial in your studies.

Our fully digital platform can be accessed **remotely** on any mobile device to provide **consistent, accurate,** and **instantaneous** results and data.

Leverage Savonix's growing database of **50 million data points** to provide you with insights into test performance and cognition, and enhance your research protocol.

We simplify the job of recruitment by helping you identify clinical trial participants based on gender, race, education, and more.

70%

of potential participants live more than 2 hours away from their nearest study center

30%

average dropout rate across all clinical trials

67%

of study sites fail to meet enrollment goal

85%

of clinical trials fail to retain enough participants

Savonix Mobile – A Superior Cognitive Assessment Tool For Researchers

Savonix provides a cost effective, scalable method to screen for cognitive impairment that mirrors the gold standard for neuropsychological assessment.

Developed by our team of neuropsychologists, our platform is a result of hundreds of years of test history. Our clinically valid cognitive tests can be completed by your participants at home on any mobile device.

	Interrater reliability	Data capture	Scientific validity	Blinding	Accessibility
Savonix Mobile	Excellent	100% Captured	Comparable to Pen and Paper	Thorough	Can Be Taken Remotely
Pen and Paper Tests	Susceptible to Human Error	Data Missed	Gold Standard	Fairly Adequate	Must Be in Person

Enroll Participants with Ease

Using Savonix is simple and straightforward. Researchers have two options: they can generate individual links for each participant or if have participants self-register on a microsite customized with the company brand.

Participants can take the test remotely in their own homes or on-site. No administrator is needed – in fact, all that is needed is a mobile device for each participant.

Option 1:

Dashboard only

Option 2:

Dashboard with participant web-based interface
